SEM Model DX-CDm™ **CD Data Destroyer**

This CD Destruction device securely and permanently removes digital information from a variety of optical storage media. This “**MANUALLY OPERATED**” device is ideal for venues where power is not required and/or available. Unit deploys a patented technology that **grinds** the information layer off of **CD, CD-ROM or CD-RW discs in accordance with NSA/CSS 04-02 guidelines**. Combined with the manual DVD Splitter, the unit is equally effective for DVDs

Data layer is ground into a fine powder leaving a polycarbonate disc with no trace of the original data. The disc can then be recycled or thrown into the trash. All data is eliminated completely and permanently and there is no possibility of forensic recovery.

The DX-CDm™ has been evaluated **by NSA and meets the requirements NSA/CSS Specification 04-02** for Optical Media Destruction Devices for the destruction of CDs.

NOTE.....The DX-CDm™ version listed on GSA Contract meets TAA (Trade Compliance) Guidelines . Unit comes with DVD splitter.

The DX-CDm™ **meets NIST SP 800-88** standard for CD Destruction and is **HIPAA, FACTA, Sarbanes-Oxley and Gramm-Leach-Bliley compliant**.

Unit Dimensions: Height 10”, Diameter 7”, Weight 20 Pounds

Warranty: 1 YEAR Parts and Labor.

Includes
DVD Splitter

SEM: **An ISO 14001 Registered Company**
