Model 0301 Jackhammer™ Hard Drive Shredder

Destroys Hard Drives, Optical Media and Assorted Electronic Devices

When it comes to the fast, safe, easy destruction of hard drives, nothing outperforms the Jackhammer™ from SEM. This slow speed, high torque shredder uses specially designed saw tooth hook cutters to destroy up to 25 hard drives per minute or up to 1,500 drives per hour. (Our testers told us it probably could have done more, but they just couldn't feed it fast enough.) It's clean, quiet, compact and vibration free. And, since it's mounted on casters you can use it anywhere.

The Jackhammer is also ideal for cell phones, BlackBerrys, optical media, memory sticks and similar electronic storage devices. A convenient discharge conveyor deposits waste into dumpsters, barrels or gaylords.

Specifications

Power: 208/230/460

Motor: 5 HP

Particle Size: 1.5"

Destruction Time: up to 25 drives per minute

Dimensions: 54"W x 50"H x 89"D
(includes discharge conveyor)

Feed Opening: 10.75" x 2.5" (maximum thickness of media to be destroyed 2.0")
