SEM Model 0300 "Jackhammer" HARD DRIVE SHREDDER

When it comes to the fast, safe, easy destruction of hard drives, nothing outperforms the Jackhammer™ from SEM. This slow speed, high torque shredder uses specially designed saw tooth hook cutters to chew up about 8 hard drives in a minute. That's just 7.5 seconds per drive. The unit is designed for an **Office Environment** and plugs conveniently into standard wall outlets. It's clean, quiet (65 to 78 dB), vibration free, and has a small footprint. And, since it's mounted on heavy duty/ lockable casters you can literally use it anywhere. Shredded material is discharged into a convenient collection box housed within the system cabinet.

Unit is MADE in AMERICA

In addition to Hard Drives, the Model 0300 Jackhammer is ideal for the shredding of : *Cell Phones, Blackberries, Data Tapes, PCBs and similar electronic Data Storage Devices.*

SPECIFICATIONS:

Drive Capacity / Speed	Up to 8 per minute / 500 per hour *
Shred Size	Random x 1.5" wide
Auto Reverse Feature	If a hard-drive jams, the cutting head reverses back and forth until the drive is shredded.
Power / HP	1 HP, 120V, 20 Amp Dedicated Circuit – SINGLE PHASE
Hour Meter	Included
Throat Width/ Feed Opening	4.5"w x 1.5" h x 6" d Feed Opening; mail box type feed chute to prevent operator's hands from reaching into the cutting chamber and protection from "fly-back" particles.
Auto Shutdown Feature	The shredder will shut down when the collection bin is full (18 pounds).
Dimensions (H x W x D)/ Weight	46" x 45" x 21" / 800 Lbs
Air Filtration	Odor Filter included
Evacuation	Internal collection bin with auto shut down when full
Safety	All doors have electronic limit switches; shredder will not operate if an access doors are open.
Std Warranty	24 Months Parts / 90 Day Labor

Preventative Maintenance Contracts available.

POWER ~ Special power required**1 Hp Motor at 120V with 20 AMP dedicated power circuit. Optimum performance requires voltage "drops" from 120V lines not to exceed 3% (a minimum of 117V).**

*** PERFORMANCE NOTE:** Maximum throughput rates are dependent upon proper power and hard drive thickness / type. Rating of 500 drives per hr assumes drives are 2.5" Technology (Notebook Style). Thicker 3.5" Technology Drives (up to a maximum 1 inch thickness) will reduce the output performance. (Note: Some 3.5" form factor drive platters may need to be removed from their housing and then shredded due to the drive design)

To determine if this is the solution for you, check out the Model 0300 product manual at <http://www.semshred.com/manuals>

The Model 0300 is designed as a low volume OFFICE PRODUCT. If you're looking for a High Volume Production solution.....check out our Hard Drive Shredder Models 0301, 0302 or 0304 at www.semshred.com
