SEM Model BNDL A4 **Hard Drive Data Destruction BUNDLE**

COMPLYING WITH NSA SPECIFICATIONS..... Did you know?

The DoD specifications for erasure of high security / classified data on Hard Drives states that the Hard Drives **MUST be DEGAUSSED** with an **NSA EPL Listed Degausser** which appears on the NSA Evaluated Products List **AND** the Hard Drive **MUST be Physically Destroyed**

The SEM Model BNDL A4 combines two necessary systems to meet this requirement:

NSA EPL Listed DEGAUSSER (SEM Model ME-P3)

The SEM MagEraSURE Model P3 is an NSA Listed Magnetic Media Degausser using Permanent Rare Earth "Fixed Magnet" Technology. The system is capable of completely erasing all data on magnetic media devices such as PMR and LMR Hard Disk Drives up to 5,000 Oe, Data Tapes (i.e. DAT, LTO, QIC, DLT, AIT, TRAVAN, etc.) , Floppy Disks, VHS / SVHS Tapes and more... up to 2,800 Oe.

The P3 Rare Earth Magnet Technology generates NO Heat so it can be used continuously. The magnets also have an infinite life expectancy. Quiet and easy to operate, the automatic Push Button design allows media to be degaussed in an amazing 15 seconds (1 second actual degauss time), making it the **FASTEST NSA Approved Degausser** in the market.

System comes equipped with adapters to accommodate various sized media. System can degauss up to four notebook drives in one 15 second cycle. Degausser comes mounted to a Height Adjustable, Foot-Pump Operated, Mobile Lift Table Workstation

Hard Drive Shredder (SEM Model 0304)

When it comes to the fast, safe, easy destruction of hard drives, nothing outperforms the Jackhammer™ from SEM. This slow speed, high torque shredder uses specially designed saw tooth hook cutters to chew up about 40 hard drives in a minute with a particle size of **3/4" Wide**. That's just 1.5 seconds per drive (Our testers told us they probably could have done more, but they just couldn't feed it fast enough). It's clean, quiet (70-88 dB), vibration free, and has a small footprint. And, since it's mounted on casters you can literally use it anywhere. With it's convenient "discharge conveyor", shredded material is easily deposited into a dumpster, barrels, Gaylord boxes or any convenient waste collection container. Unit is MADE IN AMERICA
