

Mag EraSURE™ ME-P3 - NSA Listed Maximum Security Degaussers...

Now with the World's Fastest Cycle Time!

With its blazing fast 15 second cycle time (1 second actual degauss time), the Mag EraSURE™ ME-P3 Degausser blows the doors off competitive degaussers. At 6 times faster than NSA Approved "pulse type" degaussers the ME-P3 virtually pays for itself in increased productivity and reduced manpower requirements.

Here's another way to look at it.

HARD DRIVE DEGAUSSING CAPACITY			
	Pulse type	ME - P3	P3 Advantage
Hourly	40	240	200
Daily	320	1,920	1,600
Weekly	1,600	9,600	8,000
Annually	83,200	499,200	416,000

And speed isn't the only advantage of the ME-P3's Permanent Rare Earth Magnet Design

- Listed on NSA Evaluated Products List NSA/CSS EPL-9-12A-E
- NSA Approved for LMR and PMR Drives up to 6,000 Oe and Magnetic Tape up to 2,800 Oe
- Max 14,000 Gauss (fixed magnet)
- Uses significantly less energy than electromagnetic degaussers
- Generates no heat - can be used continuously
- Quiet operation - no hearing protection required
- Virtually maintenance free
- Portable - mounted on height adjustable mobile table

Mag EraSURE™ ME-P3

When it comes to complete and permanent removal of data on hard drives and other magnetic media, no other degausser can match the Mag EraSURE™ ME-P3. The result of a joint effort by two industry powerhouses **Fujitsu**, and **SEM**, the Mag EraSURE ME-P3 is an ideal device for fast and secure degaussing of hard disk drives and back-up tapes containing confidential or highly sensitive information. The Variable Height Transportable Table makes it perfectly suited for field operation, in office environments or in most data-centers.

The Mag EraSURE is fast, quiet, reliable and totally automatic. Rare earth permanent magnets generate no heat so the ME-P3 can be used continuously.

Specifications

Mag EraSURE ME-P3 Specification		
Operation time	15 second cycle (1 second degauss)	
Surface field strength	Top	200 gauss or less
	Bottom	120 gauss or less
Rated power	100V/240V – 50/60Hz, 1.5A	
Temperature	Operating	14 to 104 degrees F
	Non-operating	-40 to 149 degrees F
Humidity	Operating	10 to 85% (non-condensing)
	Non-operating	5 to 95% (non-condensing)
Dimensions (unit only not mounted)	24"(W) x 39"(D) x 13"(H)	
Weight (main body)	Approximately 300 lbs.	
Vibration and shock	Commercial shipping and handling	
Dimensions mounted to Power Lift Table	32.5"(W) x 67"(D) x 24"(H) Lowered 32.5"(W) x 67"(D) x 50"(H) Raised	

Media Formats

Works with most desktop and notebook hard drives, even non-functioning drives. Completely removes data in 15 seconds (1 second actual degauss time).

HDD:

1.8", 2.5", 3.5"
(up to 1" height)
up to 4 laptop drives can be degaussed at once

TAPE:

SDLT, DLT, LTO, QIC,
DAT, TRAVAN, AIT,
8mm, VHS & SVHS Tapes

REMOVABLE DISKS:

Floppy, ZIP, REV, JAZZ

Recommended Accessory

NSA specifications for disposal of hard drives calls for degaussing and **physical destruction**. SEM's Model 0101 **Sledgehammer™ Hard Drive Crusher** is the fast, safe, easy solution.

At the touch of a button, it delivers a staggering 12,000 pounds of force to a conical punch causing catastrophic trauma to the drive chassis while destroying the internal platter. It is quiet, smooth, vibration free and takes only 10 seconds.
