## Security Engineered Machinery's Environmental Policy

Security Engineered Machinery is committed to protecting the environment through continuous improvement of our processes, products and services.

We achieve this by:

- Complying with and striving to exceed all applicable laws, regulations, and company standards.
- Maintaining Environmental Management Systems which include:
  - Assuring policy implementation
  - Establishing goals and targets
  - Conducting environmental audits and progress reviews
  - Communicating the policy to staff and sub contract services
- Promoting measures to prevent pollution and reduce the amount or impacts of
  - Air emissions
  - Waste disposal
  - Energy usage
- Implementing the reuse or recycling of waste materials.
- Promoting environmental awareness by making their policies known to their customer base, their employees and all persons that work on their behalf.
- Encouraging the use of environmentally friendly technologies and materials in our research, development, and engineering processes.

In summary, Security Engineered Machinery is committed to operating in an environmentally responsible manner.
